

# PRIYANSH RAI

Front-End Developer & AI Enthusiast | React.js | Prompt Engineering | Generative AI  
Jodhpur, Rajasthan, India | jpriyansh.raai@gmail.com | linkedin.com/in/priyansh-rai-0396a6333 | priyansh-rai109.github.io/priyansh-portfolio

## PROFESSIONAL SUMMARY

---

Second-year Computer Science student and front-end developer with hands-on experience building production-grade, full-stack applications. Currently developing IntellMeet, an AI-powered enterprise meeting platform, at Zidio Development, while working simultaneously as a front-end developer at The Skybrisk and InAmigos Foundation. Skilled in React, Node.js, and modern web technologies, with additional training in Generative AI, Prompt Engineering, and Retrieval-Augmented Generation (RAG). Fast learner who ships real, working products.

## SKILLS

---

**Languages:** Java, Python, C, SQL, TypeScript, JavaScript

**Front-End:** React 19, HTML5, CSS3, Tailwind CSS, Responsive Web Design

**Back-End & Databases:** Node.js, Express.js, MongoDB, PostgreSQL, PL/pgSQL, Redis, JWT Authentication, REST APIs, Socket.io, WebRTC, Leaflet.js

**AI / Machine Learning:** Prompt Engineering, Generative AI, OpenAI API, Gemini, Groq, OpenRouter, RAG Pipelines, LangChain, ChromaDB, Scikit-learn (Clustering & Classification), Whisper, ElevenLabs (STT/TTS), Streamlit

**DevOps & Tools:** Docker, Kubernetes, Helm Charts, GitHub Actions (CI/CD), Prometheus, Sentry, Git, GitHub

## EXPERIENCE

---

### Web Developer Intern — Zidio Development

*Jun 2026 – Present | Remote, India*

- Built IntellMeet, a production-grade AI meeting platform with WebRTC video conferencing, real-time Socket.io sync, and OpenAI Whisper + GPT-4 pipelines for automatic transcription and meeting summaries.
- Architected a full-stack system from scratch using React 19, TypeScript, Node.js, Express, MongoDB, and Redis.
- Implemented JWT authentication with refresh token rotation, rate limiting, and security headers for enterprise-grade security.
- Deployed the platform using Docker, Kubernetes, and Helm Charts with a GitHub Actions CI/CD pipeline, monitored via Prometheus and Sentry.

### Web Developer Intern — InAmigos Foundation (IAF)

*May 2026 – Present | Hybrid*

- Developed modern, responsive web interfaces and contributed to UI/UX improvements and optimization.
- Used AI tools to accelerate development, debugging, and content creation across real-world projects.

### Web Developer Intern — The Skybrisk

*Mar 2026 – Present | Remote/Hybrid*

- Built LuminaBooks, a full-stack Bookstore Management System using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented REST APIs, JWT authentication and authorization, and MongoDB database management.
- Styled the application with React.js and Tailwind CSS, focused on real-world problem solving.

### Content Writer Intern — InAmigos Foundation (IAF)

*Jan 2025 | Remote*

- Wrote blogs, articles, and website content with a focus on clarity and readability.
- Researched topics to ensure accurate, well-supported content and collaborated with the team to meet deadlines.

## PROJECTS

---

### IRIS 365 — Next-Gen Campus Operating System

- Designed and built an AI-powered, multi-tenant campus management platform automating operations for educational institutions, including admissions, attendance, payments, and transit.
- Developed core modules: Smart QR/Biometric attendance with RFID digital IDs, Cashless Canteen ordering, Hostel Warden Desk, Smart Gate Security, Library+ catalog system, Events Hub, and a real-time GPS Transit Tracker using Leaflet maps.

- Built an AI Concierge — an LLM-powered natural-language assistant that answers student queries on schedules, fees, and marks in real time.
- Implemented a Director Dashboard with multi-tenant financial insights, attendance analytics, and fee collection summaries.
- Engineered a PostgreSQL backend with custom PL/pgSQL functions to prevent race conditions during high-traffic registration peaks, secured with stateless JWT authentication using user-agent and IP-subnet fingerprinting.
- Built with an Express.js backend and role-based row-level security (RLS) for hardened multi-tenant data isolation.
- Live demo: iris-nu-ten.vercel.app

#### **IntellMeet — AI-Powered Enterprise Meeting Platform**

- Real-time video meetings, live chat, and screen sharing with AI-generated meeting summaries and automatic transcription.
- Smart action-item extraction and a team analytics dashboard, secured with authentication and role-based collaboration.
- Tech stack: React.js, Node.js, Express.js, MongoDB, Socket.io, WebRTC, OpenAI API, JWT.

#### **Neural Activation Visualizer — AI Dashboard**

- Built an interactive dashboard in Python and Streamlit to visualize ReLU, Sigmoid, and Tanh activation functions used in deep learning.
- Included interactive graphs and real-time activation analysis with an AI-themed UI.

#### **LuminaBooks — Bookstore Management System**

- Full-stack MERN application for managing a bookstore, including inventory, orders, and user accounts.
- Implemented secure authentication and a responsive UI with React.js and Tailwind CSS.

#### **Additional AI/ML Projects (SIN School of AI Training)**

- Prompt Agent, College Agent (RAG), ARIA — IT Support RAG Agent, and Vibe AI — conversational and retrieval-based AI applications built with LangChain and ChromaDB.
- StockVision — a real-time stock dashboard, and a Movie Prediction System using classification models.
- Hostel Mess Management System, Bus Route Tracker Pro, and a Cybersecurity Awareness Game.

## **EDUCATION**

---

### **JIET Group of Institutions, Jodhpur**

Bachelor of Technology — Computer Science Engineering

### **G S Jangid Memorial School**

Senior Secondary — Science with Mathematics

## **CERTIFICATIONS & TRAINING**

---

- Generative AI & Prompt Engineering — Summer Training, SIN School of AI (SIN Technologies) — Scored 89%, May 2026 (22 working days, hybrid mode). Covered Prompt Engineering (Chain-of-Thought, Few-Shot & Structured Prompting), RAG pipelines with LangChain and ChromaDB, full-stack AI app development, live API integration (Gemini, Groq, OpenRouter), ML fundamentals (Scikit-learn), and Voice AI (Whisper, ElevenLabs).
- Web Development (MERN Stack) Internship — Zidio Development.
- Web Developer Internship — The Skybrisk.
